First Baptist Huntsville
A Christmas Tradition Since 1984

FREE TICKETS

Tickets for each show
will be available
exclusively online
Nov. 28-Dec. 14

The star
atop our
Tree is
6 feet tall!

The Living Christmas Tree has been presented annually since 1984 [TRIVIA: The Tree was not presented in 1997 due to a sanctuary renovation].

The steel framework was manufactured by the Millard Heath Co. of Denton, TX.

The Tree structure supports over 150 singers. [TRIVIA: The singers stand on wooden platforms of varying sizes so that all heights appear to be the same.]

The interior of the Tree structure includes air-conditioning ducts to cool the singers throughout the presentations.

The star at the top of the Tree includes 455 miniature lights.

The lights on and around the Tree are controlled electronically through 75 individual control channels

The Tree structure is erected and wired by dozens of FBC Members over a period of 2 days. The installation of lights and greenery is then accomplished by numerous other members over a 3 day period.

December 15-18, 2022

Let Heaven and Earth Rejoice

with guest artist
Steve Amerson

By the Numbers *approximately*
6,000 lbs. 39 feet high including
star width of 30 feet 337 pieces of
